

The SAM Launch

***SAM Launch 01-01*; Subject: We have lift-off.**

1. Your USAFSAM subject matter experts (SMEs) who teach in the spectrum of Team Aerospace courses are committed to providing the most current and relevant information to students who complete distance learning or in-residence courses here at the school house. As part of maintaining that currency, these SMEs are tuned in to a variety of military and civilian information sources and stay abreast of the latest changes which may affect day-to-day base-level operations.
2. As these SMEs scan the horizon and identify these changes to current programs and policies, we at USAFSAM will use *SAM Launch* to get this word out to you. We will launch these updates in real time, as we identify pertinent items, rather than saving them and sending them out in a monthly or quarterly newsletter. They will be numbered sequentially, emailed to MAJCOM leaders, and will be posted on our USAFSAM website. This first edition includes a listing of the USAFSAM executive leadership.
3. Our goal is to share the expertise of our SMEs as widely as possible and to assist Team Aerospace in its efforts to maximize the health and fitness of our force and family.

// *Signed* //

RODGER D. VANDERBEEK
Colonel, USAF, MC, CFS
Commander
